**SMART
AUTOMATION**

SENIOR LIVING AUTOMATION

Safety & Security | Comfort & Convenience | Centralized Management

**SAFETY AND COMFORT
FOR SENIORS**

**PRODUCTIVITY FOR
MANAGEMENT**

Our solutions for Senior Living are aimed at providing Safety & Security to senior occupants and enabling their comfort and convenience.

For the Management of the facility, we offer centralized monitoring of living and common spaces and an IBMS for control of the entire facility.

SAFETY & SECURITY

Call Buttons

Wireless or wired Wall mounted call buttons and Pull cords in bathrooms, all of which can be centrally monitored for response and include acknowledgement feature that indicates response completion.

Safety/Security Sensors

Sensors for smoke, gas leak and intrusion that can be centrally monitored and also provide local alarms. In emergencies, people presence can be detected in spaces based on motion sensors.

COMFORT & CONVENIENCE

Remote Control Automation

Occupants can control all basic items in their space- lights, fans, curtains and even door lock from a single remote.

Smart App Automation

Occupants can control all basic items in their space including lights, fans, curtains, door locks and see visitors on VDP via Smart App

CENTRALIZED MANAGEMENT

Facility Management System

This system enables management of all facility assets and property data via Smart App. It supports all critical management processes such as Maintenance Tasks, Service Requests, PM schedules, Warranty & AMC management.

Building Management System [BMS]

The BMS system enables control of all electrical assets centrally including – lighting, motors, pumps, DG sets and more. It allows central monitoring of safety and security sensors across the property and perimeter. It also provides single point access for all surveillance cameras.
